

Developer Software / Firmware

Role and responsibility:

Job purpose is to work within Development Team dealing with products created within Fujitsu Product Development Group (YOU will be part of worldwide Fujitsu development community) – PRIMERGY and ETERNUS CS. The role covers design, implementation and integration of functional requirements of new components and products which satisfy the customer and give competitive advantage to Fujitsu. Ability to work in multinational environment is a must.

Fujitsu is searching for different levels of seniority (junior, regular, seniors) – all are welcomed!!!!

Tasks and responsibilities:

- Be an active team member within development team with the attitude to develop best in class and innovative products
- Design, specification, implementation, unit and function testing of software/firmware features within an iterative development process
- Integration of software/firmware features and adaptation to new hardware, firmware, and software versions
- Creation of technical documentation
- End-to-end diagnosis of problems and performance analysis
- Provide development support for performance analysis of complex systems as basis for system sizing, optimization and tuning

Required skills:

- **Good English language skills** (fluent in written and spoken); German (nice to have)
- University degree or equivalent education or experience
- Knowledge of server management or storage management concepts
- Experience in following programming languages (at least one of them): Java/C/C++
- Experience with at least one scripting language (Perl, Python, Tcl/Tk, Ruby, shell scripting...)
- Well-founded knowledge of at least one operating system (Linux, Windows Server)
- Source/build management
- Knowledge of generic system performance and tuning concepts
- Virtual machine handling
- Knowledge in the storage area (e.g. HSM concept, deduplication concepts, backup and recovery, archiving, NAS)
- Knowledge in the area of server management (e.g. IPMI, CIM, WSMAN, SNMP)

We offer:

- An interesting job in one of the largest IT companies
- Challenging work environment
- Highly motivated team and international corporate culture
- Competitive salary
- IT & soft skills trainings
