Oracle and/or its affiliates provided technical input and review on portions of this material.

Oracle and/or its affiliates and Fujitsu Limited each own or control intellectual property rights relating to products and technology described in this document, and such products, technology and this document are protected by copyright laws, patents, and other intellectual property laws and international treaties.

This document and the product and technology to which it pertains are distributed under licenses restricting their use, copying, distribution, and decompilation. No part of such product or technology, or of this document, may be reproduced in any form by any means without prior written authorization of Oracle and/or its affiliates and Fujitsu Limited, and their applicable licensors, if any. The furnishings of this document to you does not give you any rights or licenses, express or implied, with respect to the product or technology to which it pertains, and this document does not contain or represent any commitment of any kind on the part of Oracle or Fujitsu Limited or any affiliate of either of them.

This document and the product and technology described in this document may incorporate third-party intellectual property copyrighted by and/or licensed from the suppliers to Oracle and/or its affiliates and Fujitsu Limited, including software and font technology.

Per the terms of the GPL or LGPL, a copy of the source code governed by the GPL or LGPL, as applicable, is available upon request by the End User. Please contact Oracle and/or its affiliates or Fujitsu Limited. This distribution may include materials developed by third parties. Parts of the product may be derived from Berkeley BSD systems, licensed from the University of California.

UNIX is a registered trademark of The Open Group.

Oracle and Java are registered trademarks of Oracle and/or its affiliates.

Fujitsu and the Fujitsu logo are registered trademarks of Fujitsu Limited.

SPARC Enterprise, SPARC64, SPARC64 logo and all SPARC trademarks are trademarks or registered trademarks of SPARC International, Inc. in the United States and other countries and used under license.

Other names may be trademarks of their respective owners.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

Disclaimer: The only warranties granted by Oracle and Fujitsu Limited, and/or any affiliate in connection with this document or any product or technology described herein are those expressly set forth in the license agreement pursuant to which the product or technology is provided.

EXCEPT AS EXPRESSLY SET FORTH IN SUCH AGREEMENT, ORACLE OR FUJITSU LIMITED, AND/OR THEIR AFFILIATES MAKE NO REPRESENTATIONS OR WARRANTIES OF ANY KIND (EXPRESS OR IMPLIED) REGARDING SUCH PRODUCT OR TECHNOLOGY OR THIS DOCUMENT, WHICH ARE ALL PROVIDED AS IS, AND ALL EXPRESS OR IMPLIED CONDITIONS, REPRESENTATIONS AND WARRANTIES, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NONINFRINGEMENT, ARE DISCLAIMED, EXCEPT TO THE EXTENT THAT SUCH DISCLAIMERS ARE HELD TO BE LEGALLY INVALID. Unless otherwise expressly set forth in such agreement, to the extent allowed by applicable law, in no event shall Oracle or Fujitsu Limited, and/or any of their affiliates have any liability to any third party under any legal theory for any loss of revenues or profits, loss of use or data, or business interruptions, or for any indirect, special, incidental or consequential damages, even if advised of the possibility of such damages.

DOCUMENTATION IS PROVIDED "AS IS" AND ALL EXPRESS OR IMPLIED CONDITIONS, REPRESENTATIONS AND WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT, ARE DISCLAIMED, EXCEPT TO THE EXTENT THAT SUCH DISCLAIMERS ARE HELD TO BE LEGALLY INVALID.

Copyright © 2007, 2017, Fujitsu Limited. Tous droits réservés.

Oracle et/ou ses affiliés ont fourni et vérifié des données techniques de certaines parties de ce composant.

Oracle et/ou ses affiliés et Fujitsu Limited détiennent et contrôlent chacun des droits de propriété intellectuelle relatifs aux produits et technologies décrits dans ce document. De même, ces produits, technologies et ce document sont protégés par des lois sur le droit d'auteur, des brevets, et d'autres lois sur la propriété intellectuelle et des traités internationaux. Ce document, produit et les technologies afférents sont exclusivement distribués avec des licences qui en restreignent l'utilisation, la copie, la distribution et la décompilation. Aucune partie de ce produit, de ces technologies ou de ce document ne peut être reproduite sous quelque forme que ce soit, par quelque moyen que ce soit, sans l'autorisation écrite préalable d'Oracle et/ou ses affiliés et de Fujitsu Limited, et de leurs éventuels concédants de licence. Ce document, bien qu'il vous ait été fourni, ne vous confère aucun droit et aucune licence, exprès ou tacites, concernant le produit ou la technologie auxquels il se rapporte. Par ailleurs, il ne contient ni ne représente aucun engagement, de quelque type que ce soit, de la part d'Oracle ou de Fujitsu Limited, ou des sociétés affiliées de l'une ou l'autre entité.

Ce document, ainsi que les produits et technologies qu'il décrit, peuvent inclure des droits de propriété intellectuelle de parties tierces protégés par le droit d'auteur et/ou cédés sous licence par des fournisseurs à Oracle et/ou ses sociétés affiliées et Fujitsu Limited, y compris des logiciels et des technologies relatives aux polices de caractères.

Conformément aux conditions de la licence GPL ou LGPL, une copie du code source régi par la licence GPL ou LGPL, selon le cas, est disponible sur demande par l'Utilisateur Final. Veuillez contacter Oracle et/ou ses affiliés ou Fujitsu Limited. Cette distribution peut comprendre des composants développés par des parties tierces. Des parties de ce produit pourront être dérivées des systèmes Berkeley BSD licenciés par l'Université de Californie.

UNIX est une marque déposée de The OpenGroup.

Oracle et Java sont des marques déposées d'Oracle Corporation et/ou de ses affiliés.

Fujitsu et le logo Fujitsu sont des marques déposées de Fujitsu Limited.

SPARC Enterprise, SPARC64, le logo SPARC64 et toutes les marques SPARC sont utilisées sous licence et sont des marques déposées de SPARC International, Inc., aux Etats-Unis et dans d'autres pays.

Tout autre nom mentionné peut correspondre à des marques appartenant à leurs propriétaires respectifs.

Si ce logiciel, ou la documentation qui l'accompagne, est concédé sous licence au Gouvernement des Etats-Unis, ou à toute entité qui délivre la licence de ce logiciel ou l'utilise pour le compte du Gouvernement des Etats-Unis, la notice suivante s'applique :

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

Avis de non-responsabilité : les seules garanties octroyées par Oracle et Fujitsu Limited et/ou toute société affiliée de l'une ou l'autre entité en rapport avec ce document ou tout produit ou toute technologie décrits dans les présentes correspondent aux garanties expressément stipulées dans le contrat de licence régissant le produit ou la technologie fournis.

SAUF MENTION CONTRAIRE EXPRESSEMENT STIPULEE AU DIT CONTRAT, ORACLE OU FUJITSU LIMITED ET/OU LES SOCIETES AFFILIEES A L'UNE OU L'AUTRE ENTITE DECLINENT TOUT ENGAGEMENT OU GARANTIE, QUELLE QU'EN SOIT LA NATURE (EXPRESSE OU IMPLICITE) CONCERNANT CE PRODUIT, CETTE TECHNOLOGIE OU CE DOCUMENT, LESQUELS SONT FOURNIS EN L'ETAT. EN OUTRE, TOUTES LES CONDITIONS, DECLARATIONS ET GARANTIES EXPRESSES OU TACITES, Y COMPRIS NOTAMMENT TOUTE GARANTIE IMPLICITE RELATIVE A LA QUALITE MARCHANDE, A L'APTITUDE A UNE UTILISATION PARTICULIERE OU A L'ABSENCE DE CONTREFACON, SONT EXCLUES, DANS LA MESURE AUTORISEE PAR LA LOI APPLICABLE. Sauf mention contraire expressément stipulé dans ce contrat, dans la mesure autorisée par la loi applicable, en aucun cas Oracle ou Fujitsu Limited et/ou l'une ou l'autre de leurs sociétés affiliées ne sauraient être tenues responsables envers une quelconque partie tierce, sous quelque théorie juridique que ce soit, de tout manque à gagner ou de perte de profit, de problèmes d'utilisation ou de perte de données, ou d'interruptions d'activités, ou de tout dommage indirect, spécial, secondaire ou consécutif, même si ces entités ont été préalablement informées d'une telle éventualité.

LA DOCUMENTATION EST FOURNIE "EN L'ETAT" ET TOUTE AUTRE CONDITION, DECLARATION ET GARANTIE, EXPRESSE OU TACITE, EST FORMELLEMENT EXCLUE, DANS LA MESURE AUTORISEE PAR LA LOI EN VIGUEUR, Y COMPRIS NOTAMMENT TOUTE GARANTIE IMPLICITE RELATIVE A LA QUALITE MARCHANDE, A L'APTITUDE A UNE UTILISATION PARTICULIERE OU A L'ABSENCE DE CONTREFACON.

Preface v

List of Abbreviations 1

Glossary 3

Preface

This document describes the terms used in the documents of the SPARC M12/M10 from Oracle or Fujitsu.

Fujitsu SPARC M12 is sold as SPARC M12 by Fujitsu in Japan.
Fujitsu SPARC M12 and SPARC M12 are identical products.

Fujitsu M10 is sold as SPARC M10 by Fujitsu in Japan.
Fujitsu M10 and SPARC M10 are identical products.

The preface includes the following sections:

- Audience
 - Related Documentation
 - Document Feedback
-

Audience

This document is designed for system administrators with advanced knowledge of computer networks and Oracle Solaris.

Related Documentation

All documents for the server you use are available online at the following locations.

- Sun Oracle software-related documents (Oracle Solaris, etc.)
<http://docs.oracle.com/en/>
- Fujitsu documents
Global site
<http://www.fujitsu.com/global/products/computing/servers/unix/sparc/downloads/manuals/>
Japanese site
<http://www.fujitsu.com/jp/products/computing/servers/unix/sparc/downloads/manual/>

For a system using the SPARC M12, see the manuals listed in "[Documentation Related to the SPARC M12](#)."

For a system using the SPARC M10, see the manuals listed in "[Documentation Related to the SPARC M10](#)."

- Japanese site
<http://www.fujitsu.com/jp/products/computing/servers/unix/sparc/contact/>

List of Abbreviations

This section describes the abbreviations used with the SPARC M12/M10 and the formal names of these abbreviations.

Note - For the terms related to Oracle VM Server for SPARC, see "Glossary" in the *Oracle VM Server for SPARC Administration Guide* of the version used.

Note - This section does not describe generally well-known terms.

BB
building block

CMU
CPU memory unit

DR
dynamic reconfiguration

FANU
fan unit

FRU
field replaceable unit

LSB
logical system board

OPNL
operation panel

PHP
PCI hot plug

PCL
PPAR configuration list

PDU
power distribution unit

POST
power-on self test

PPAR
physical partition

PPAR DR
physical partition dynamic reconfiguration

PSB
physical system board

PSU
power supply unit

PSUBP
PSU backplane

RCIL
remote cabinet interface over LAN

SSCP

SP to SP communication protocol

XBBOX

crossbar box

XBBPU

crossbar backplane unit

XBU

crossbar unit

XSCF

extended system control facility

XSCFIFU

XSCF interface unit

XSCFU

XSCF unit

Glossary

This section mainly describes the specific terms used with the SPARC M12/M10.

Note - For the terms related to Oracle VM Server for SPARC, see "Glossary" in the *Oracle VM Server for SPARC Administration Guide* of the version used.

Note - This section does not describe generally well-known terms.

BB-ID

The ID used for identifying the SPARC M12-2S or SPARC M10-4S in a building block configuration.

building block (BB) configuration

A configuration connecting multiple SPARC M12-2S or SPARC M10-4S units in the building block method. A single SPARC M12-2S or SPARC M10-4S is called the 1BB configuration, and a configuration with n units of the SPARC M12-2S/M10-4S is called the nBB configuration. (Example: 4BB configuration)

building block (BB) method

The method of connecting multiple SPARC M12-2S or SPARC M10-4S units through a high-speed interconnect, which is a unique technology developed by Fujitsu. This method enables expansion up to 16 units.

control domain console

The console for operating the control domain.

CPU Activation

The mechanism for using CPUs in units of cores in the SPARC M12/M10. CPU core resources are available with a CPU Activation key. CPU Activation may be written as "COD" or "CoD" in system messages and documents.

CPU Activation key

The key that enables use of CPU cores. You can obtain it by purchasing a CPU

Activation.

CPU memory unit (CMU)

The unit consisting of a CPU, memory, etc. Two CPU memory units can be mounted in the SPARC M12-2/M12-2S/M10-4/M10-4S. The one mounted in the lower location is called CMUL, and the one mounted in the upper location is called CMUU.

crossbar backplane unit (XBBPU)

The unit connecting the internal units composing the crossbar box with each other.

crossbar box (XBBOX)

The unit connecting building blocks (BBs) with each other in a large-scale building block configuration.

crossbar cable

The cable connecting building blocks (BBs) with each other in a building block configuration. There are two types of crossbar cables: optical cables and electrical cables.

crossbar unit (XBU)

The external interface unit connecting building blocks (BBs) with each other in a building block configuration.

degraded

The action to release a unit or function where a failure may have occurred. The action to prevent the failure from affecting the system operation.

domain

The environment where Oracle Solaris configured on the SPARC M12/M10 system can run independently. In the SPARC M12/M10 system, you can configure multiple domains and assign hardware resources to each domain.

eXtended System Control Facility (XSCF)

The firmware that controls and monitors the SPARC M12/M10.

fan unit (FANU)

The unit for cooling components inside the chassis of the SPARC M12/M10 system.

field replaceable unit (FRU)

The unit that can be used for replacement, expansion, or reduction of one of the components composing the SPARC M12/M10.

I/O board

The unit of physical resources divided by partitioning in a configuration connecting multiple SPARC M12-2S or SPARC M10-4S units in the building block method.

logical system board (LSB)

The board that is associated with a BB in order to be recognized from the domain side when the physical partition (PPAR) is configured. It means a single SPARC M12/M10.

master XSCF

The XSCF that monitors, manages, and controls the entire system in a building block configuration.

operation panel (OPNL)

The operation panel installed at the front of the server main unit.

PCI expansion unit

An optional device for PCIe slot expansion. It is connected by an optical or electrical cable via a link card mounted in the SPARC M12/M10.

physical partition (PPAR)

The unit of physical resources divided by partitioning in a configuration connecting multiple SPARC M12-2S or SPARC M10-4S units in the building block method.

physical partition dynamic reconfiguration (PPAR DR)

The function that enables the addition and deletion of hardware resources (CPU, memory, and I/O) in a physical partition while continuing business on the physical partition.

physical system board (PSB)

The smallest unit of hardware resource for the configuration of a physical partition (PPAR). It means a single SPARC M12/M10.

power distribution unit (PDU)

The unit mounted in the expansion rack to supply power to the crossbar box and SPARC M10-4S.

power supply unit (PSU)

The unit for supplying power to the SPARC M12/M10 system.

power-on self test (POST)

The diagnosis test that is automatically executed when the SPARC M12/M10 is powered on. This test determines whether memory or other hardware has failed.

PPAR configuration list

Information on the hardware resources in each physical partition.

PPAR-ID

The ID used for identifying a physical partition. You can assign up to as many PPAR-IDs as the number of SPARC M12 or SPARC M10 units in a configuration in which multiple SPARC M12-2S units or SPARC M10-4S units are connected in the building block method. For a system in a single-unit configuration, the PPAR-ID is fixed at 0.

- SPARC M12-2S/M10-4S: The PPAR-ID identifies a physical partition in a range of PPAR-ID 0 to 15.
- SPARC M12-1/M12-2/M10-1/M10-4: The PPAR-ID is fixed at 0.

PSU backplane (PSUBP)

The PSU backplane supplies power from the power supply unit to the units composing the SPARC M12/M10.

RCIL

The interface using IPMI (Intelligent Platform Management Interface) over LAN to implement functions such as power control and network state monitoring.

service processor

The processor to control and monitor the SPARC M12/M10.

slave XSCF

The state of an XSCF that is neither a master XSCF nor standby XSCF in a building block configuration. A slave XSCF operates in cooperation with the master XSCF, and it monitors, manages, and controls the unit in which it is installed.

SP to SP communication protocol (SSCP)

The protocol for an inter-XSCF network used in a building block configuration.

standby XSCF

The XSCF that operates as the backup to the master XSCF in a building block configuration. If a failure occurs in the master XSCF, the standby XSCF is switched to the master XSCF to continue system control and monitoring.

system control network

The network used for maintenance and management of the SPARC M12/M10. The term is synonymous with "XSCF network."

takeover IP address

A virtual IP address to be assigned to the master XSCF and standby XSCF in a

building block configuration. A virtual IP address allows you to log in to the master XSCF by using an invariable IP address even when the master XSCF and standby XSCF are switched to each other.

XCP

The package that includes multiple firmware for controlling the SPARC M12/M10. It consists of the following firmware:

- XSCF
- OpenBoot PROM
- Hypervisor
- Power-on self test (POST)

XSCF interface unit (XSCFIFU)

The interface unit that is mounted only in a crossbar box and connects the XSCF of the crossbar box and the one of the SPARC M12-2S/M10-4S.

XSCF network

The network used by the XSCF firmware to manage and monitor the SPARC M12/M10. The term is synonymous with "system control network."

XSCF shell

The command-line interface (CLI) function of the XSCF.

XSCF unit (XSCFU)

The unit where the service processor with the installed XSCF firmware is mounted. The unit is mounted in a crossbar box and the SPARC M12-2/M12-2S. For convenience, a component that has the mounted service processor in the SPARC M12-1/M10-1/M10-4/M10-4S is sometimes called the XSCF unit.

XSCF Web

The browser user interface (BUI) function of the XSCF firmware.
