

FUJITSU Smart Factory Digital Work and Operation Tracking (DWOT)

Digital Innovation

Incident Management

Real time reporting of incident

- Visibility of all incidents happened in one screen
- Collect data from sensors and human reports
- Automatic job dispatch to solve problems immediately

Contractor Management

Data centralization to achieve higher efficiency

- Assign right person to the right job
- Work history can be tracked
- Work permit e-approval

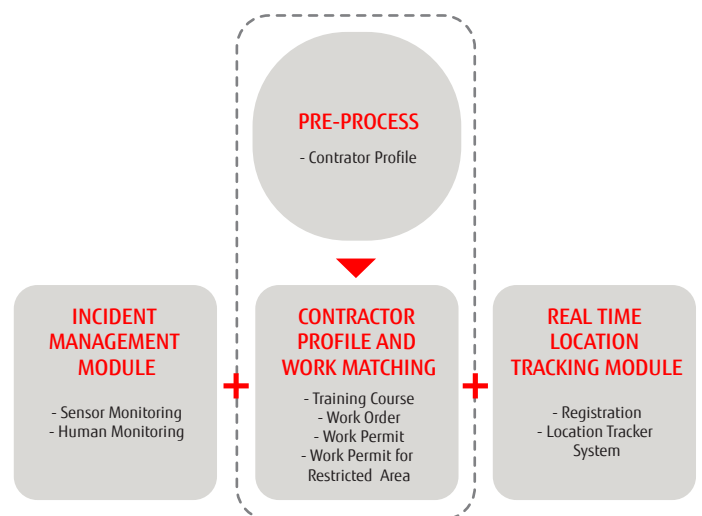

Real Time Location Tracking

Ensure Digital safety and Monitor Productivity

- Control access to restricted areas
- Prevent contractors to work without work permit
- Prevent billing leakage and ensure productivity

DWOT(Digital Work and Operation Tracking)

This system collects all incidents in the factory, analyses and automatically dispatch tasks accordingly. It keeps profile including skillsets and training history of the contractors and integrated to ERPs to update tasks needed to be done. The right contractor will be shortlisted automatically. Work permit approval process is streamlined and paperless. Workers can also be tracked by WIFI Tags for their safety and productivity.

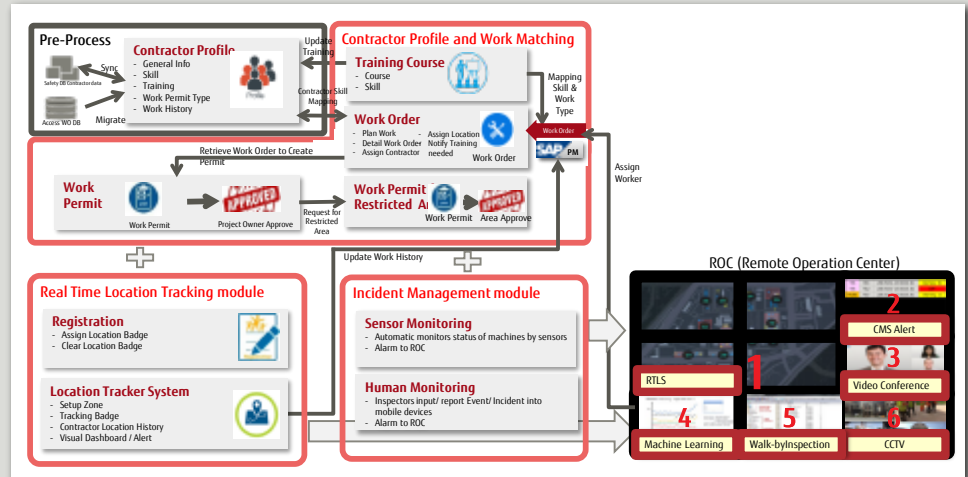

Improve more efficiency of workforce

Operation Efficiency and Cost Saving

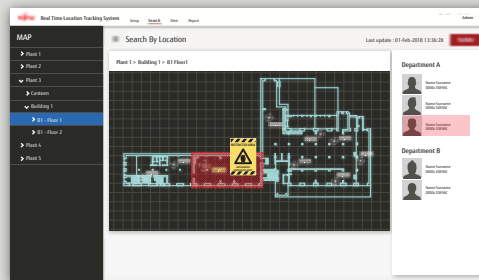

- Centralize all incidents in one platform for operation efficiency
- Dispatch tasks according to standard procedure
- Improve regulatory compliances for work permit
- Streamline process and cost through work permit workflow
- Improve contractor skills through qualifications and training management

Real Time monitoring people safety and physical security

Intelligent Dashboard - Overall Maintenance Visualization and Control

- Enables all incidents to be visualized in one screen
- Able to manage problem solving easily with automatic standard procedures
- Improve more on people safety in hazardous areas
- Give notifications and alert when unauthorized person enters a non-permitted area
- Track productivity of workers more efficiently
