

SAP S/4HANA and iRPA

Delivering SAP End-to-End

SAP® Qualified
Partner-Packaged Solution

The Route to Competitive Advantage in the Digital Economy

In a digital enterprise, SAP S/4HANA serves as a digital core driving significant value by transforming key business processes with intelligent automation and built-in intelligent technologies.

Fujitsu's SAP S/4HANA implementation package focuses on four core SAP modules—Finance & Accounting, Costing & Controlling, Material Management, Sales and Distribution. As a result, key business processes—budgeting, finance and accounting, asset lifecycle, Thai localization, procurement to pay and order to cash—are fully integrated in SAP S/4HANA.

Intelligent Robotic Process Automation (iRPA), an intelligent technology that is a part of the Business Technology Platform of SAP, drives business value by emulating your users to execute processes across multiple systems. With an iRPA solution, you can automate repetitive manual processes by creating, scheduling, managing, and monitoring intelligent bots and redirect your resources toward high-value activities and processes.

Value Generated by an iRPA solution

Improve Operations

Redirect resources to high-value tasks.

Increase Service Quality

Reduce cycle times for revenue generating transactions.

Increase Compliance

Well-documented audit trails and analysis capabilities.

Reduce Human Errors

Gain speed and efficiency.

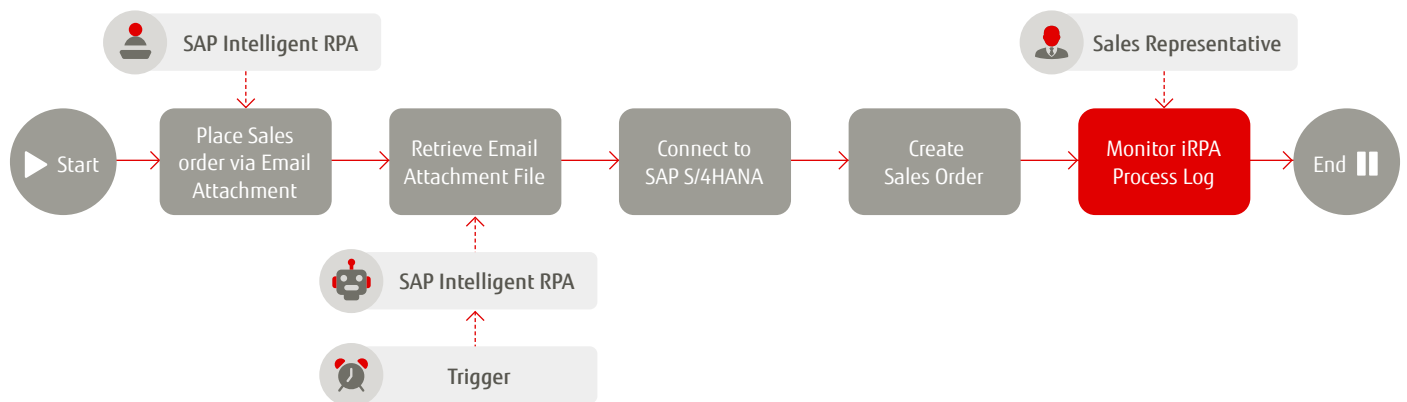

SAP S/4HANA and iRPA Implementation Package

The SAP S/4HANA implementation package allows you to choose one iRPA solution from the four available iRPA solutions—Automate Sales Order Creation, Automate Incoming Invoice Verification, Automate Daily Exchange Rate Updating, and Automate Bank Statement Downloading—to support the dynamic growth of your business and to maximize your benefit and business return.

iRPA 1 Automate Sales Order Creation

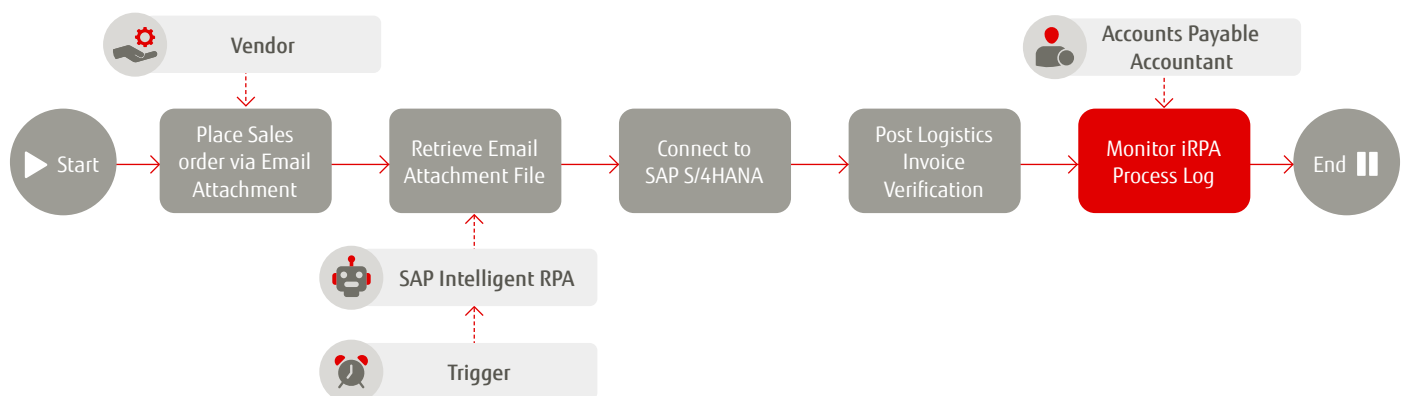

This solution is designed to embed into the Order to Cash process, by retrieving the ordering email from the customer and automating the sales order creation in S/4HANA.

iRPA 2 Automate Incoming Invoice Verification

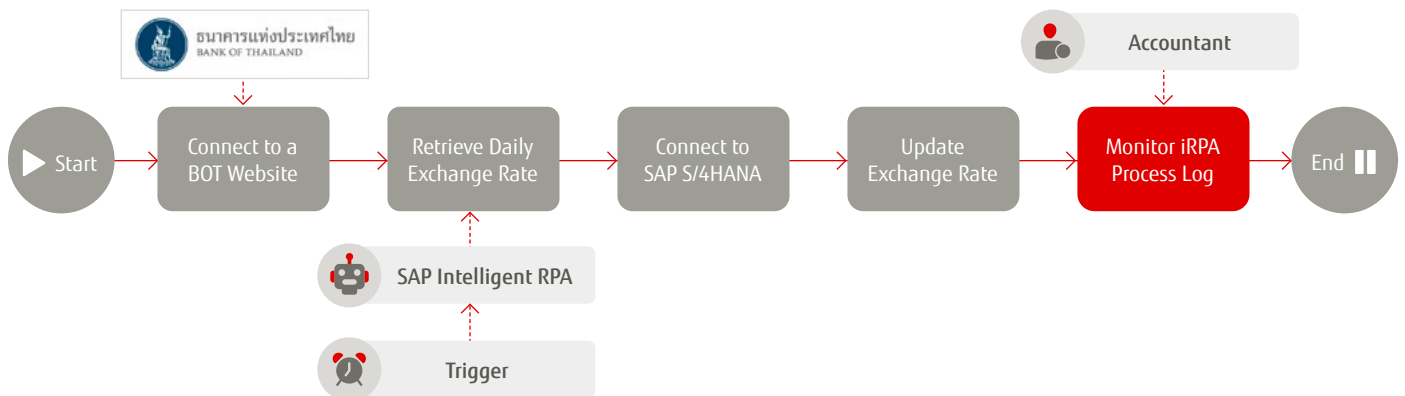

This solution is designed to embed into the procurement to pay process by retrieving the vendors' invoice and posting the incoming invoice verification in S/4HANA.

*This solution can handle up to three different commercial banks.

iRPA 3 Automate Daily Exchange Rate Updating

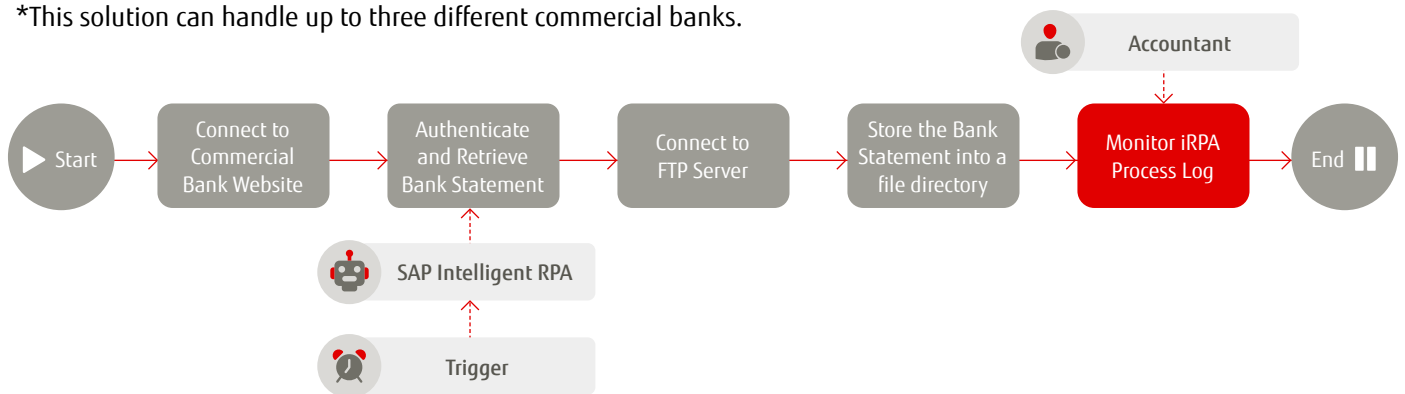

This solution is designed to embed into the finance & accounting process, by connecting to Bank of Thailand website and updating the currency exchange rate into S/4HANA

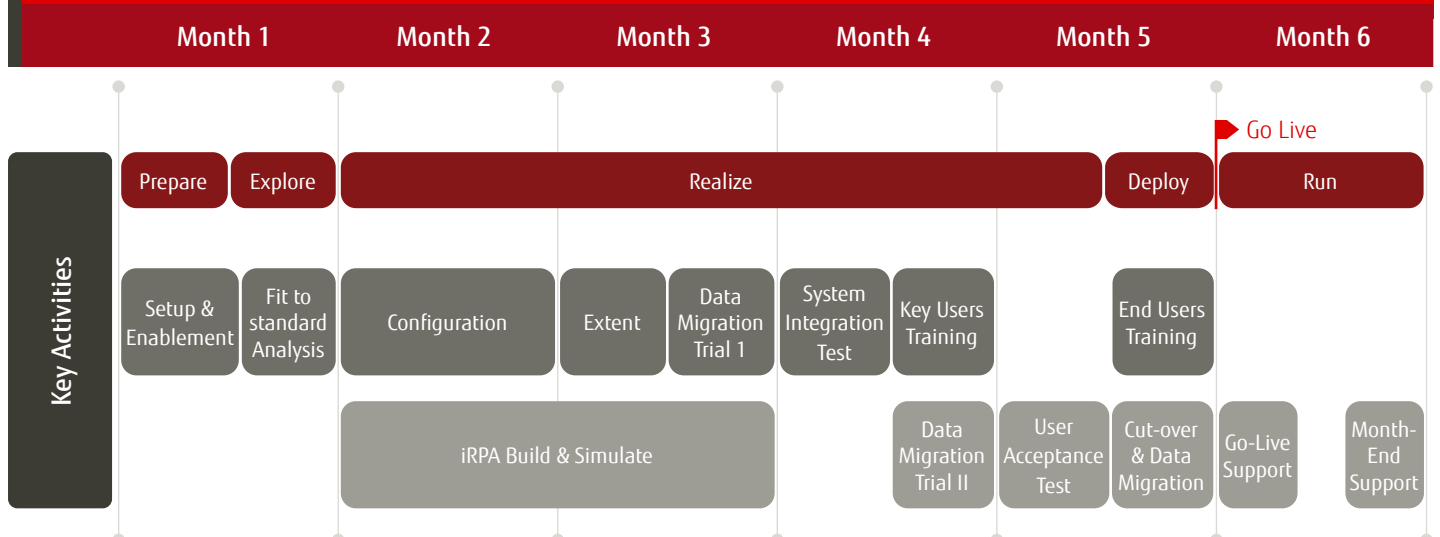

iRPA 4 Automate Bank Statement Downloading

This solution is designed to embed into the finance & accounting process, by connecting to the commercial bank website and downloading the bank statement to the file directory.

*This solution can handle up to three different commercial banks.
