ETERNUS AST Workshop

Professional Services for IT Hardware

INTRODUCTION

Fujitsu offers a one day AST workshop package for the ETERNUS DX product range that empowers your storage management team to effectively configure the AST Storage tiering functionality in the most appropriate way for your requirements.

The ETERNUS AST Workshop service covers:

- Registering the ETERNUS DX and required licences.
- Enabling Automated Storage Tiers.
- Creating Tier Policies.
 - Policy Name
 - Execution Mode
 - Evaluation Standards/Period/Day/Time
 - AST Time Limit
 - Data Type
- Creating the Tier Pool.
- Create FTV (Flexible Tier Volumes).
- Starting/Stopping relocation of data within the volumes.
- Confirm Evaluation/Results.
- Starting/Stopping Tier Pool Balancing.

BENEFITS

- Highly skilled and experienced Fujitsu specialist staff are on hand to guide you through the setting up and monitoring of the Automation tool.
- Worry free assured configuration process, minimising reliance on potentially product unfamiliar resources.
- Fast configuration activity with clearly defined costs of implementation.

PREREQUISITES

- Requires the pre-installation of the AST software to the SF Manager client with licenses available.

Product Support Services with different service levels agreements are recommended to safeguard each product and ensure smooth IT operation.

Solutions

<http://www.fujitsu.com/global/solutions>

The Fujitsu solutions combine reliable Fujitsu products with the best in services, know-how and worldwide partnerships. Fujitsu's Solutions include parts of one or more activity groups (e.g., planning, implementation, support, management, and training services) and are designed to solve a specific business need.

Infrastructure Solutions are customer offerings created by bringing Fujitsu's best products, services and technologies together with those from partners to deliver benefit to our customers' businesses.

Industry Solutions are tailored to meet the needs of specific verticals.

Business and Technology Solutions provide a variety of technologies developed to tackle specific business issues such as security and sustainability, across many verticals.

Services

www.fujitsu.com/global/services/

Several customizable Fujitsu Service offerings ensure that IT makes a real difference and delivers true business value. We do this by leveraging our extensive experience in managing large, complex, transformational IT programs to help clients in planning, delivering and operating IT services in a challenging and changing business environment.

Application Services support the development, integration, testing, deployment and on-going management of both custom developed and packaged applications. The services focus on delivering business and productivity improvements for organizations.

Business Services respond to the challenge of planning, delivering and operating IT in a complex and changing IT environment.

Managed Infrastructure Services enable customers to deliver the optimal IT environment to meet their needs; achieving high levels of IT service quality and performance for data centre and end user environments.

Fujitsu green policy innovation

www.fujitsu.com/global/about/environment/

Fujitsu Green Policy Innovation is our worldwide project for reducing burdens on the environment. Using our global knowhow, we aim to resolve issues of environmental energy efficiency through IT.
