

Infrastructure blueprint for secondary education

1.0
Inquisitive minds need to be kept busy. And at this level of education, it's vital.

2.0
Without good technology, you might not be moving into the future as fast as your students and teachers need.

3.0
But, if you can overcome your technology challenges, you could open up a whole new world.

The biggest benefits delivered to The Warren School

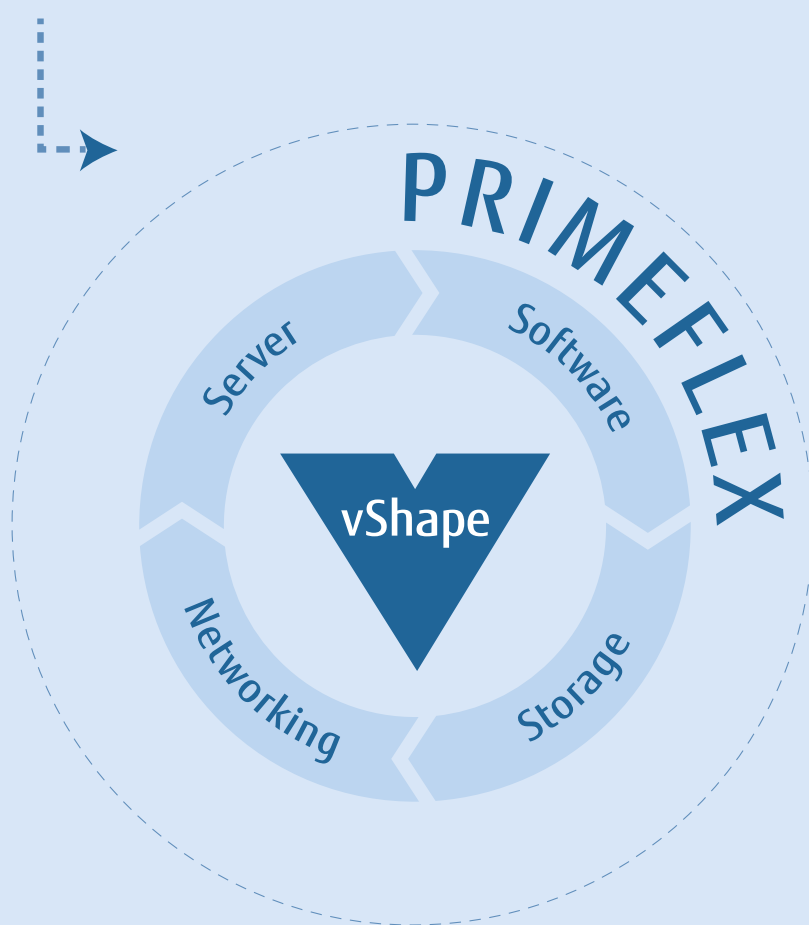

Students and staff have more freedom. Remote access to file and applications also improved how students submit homework.

Staff have an effective 'bring your own device' programme.

"We have moved to a 21st century infrastructure, with virtual desktops, more storage resources, and a flexible, affordable way to manage our IT. Our new systems are robust, efficient, virtual and future-ready."

The Warren School

Keep your data secure – and stay in control.
Store sensitive student, staff and parent data in one secure place. And keep complete control over it.

Works with underlying **LEGACY** IT infrastructure

- Integrates easily with legacy IT as it uses leading virtualisation software from VMware or Microsoft

BUDGETS are key, so minimising TCO is vital

- Reduces TCO through low operating costs
- Frees up IT resource thanks to easy management

Reduces administration by 20% and operating costs by 40%.

Solutions need to be **FUTURE** proof

- Rolls out new ICT in a simple way, with servers, storage and networking in a single enclosure that allows you to pay as you grow

ACCESS to information and apps

- Allows easier access and control of information by creating a highly available, centralised resource
- Meets all front-end demands without affecting teaching time, thanks to a robust back-end

'Applications usually limited to computers in different departments, can be delivered instantly to anywhere in the school, and provide a more flexible use of classrooms.' Network Manager, the Warren School.
