

Robotic Process Automation: Explained

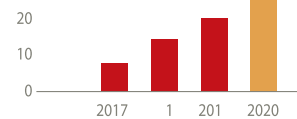

shaping tomorrow with you

25% of work could potentially be automated; **including the CEO's**

Source: McKinsey

By 2020, organizations will have a **20-25%** digital workforce.

Robotic Process Automation...

"Uses software to emulate the way people work in any system or application, to deliver automation of repetitive and mundane rule based tasks without impacting the smoothing running of your business."

Robotic Process Automation will...

- Revolutionise 64%** of management business and financial tasks by 2020.
- Free up 30%** of your workforce within **12 months**.
- Have an estimated economic impact of **\$5-7 trillion by 2025**.

Employees spend **10-20%** of their time on repetitive tasks

IT departments spend **30%** of their time on basic low-level tasks

50% of automation opportunities are being missed

Why choose Fujitsu powered by Thoughtonomy

Fujitsu will co-create with customers to support their RPA journey, helping them transform their businesses

Fujitsu has rich experience and a consultative approach to automation.	Improve your employee satisfaction by reducing volumes of mundane work.	RPA as Software As A Service (SaaS) enables a rapid, secure and cost efficient delivery.
Our cloud deployment creates a flexible workforce that works across your business.	Use intelligent automation to assist human work and enhance decision-making.	Bring artificial AI and cognitive capabilities to our customers combined with RPA.
