

Fujitsu Research of Europe

Quantum Computing (Hardware)

Research Manager

Slough (UK)

Are you someone who enjoys using your research mindset to explore and innovate? Do you want to collaborate with committed people and achieve results together to develop truly human centric innovation?

Well, here at Fujitsu Research of Europe (FRE), we are combining research and industrial innovation to transform businesses and society. FRE is a multidisciplinary center which, as part of Fujitsu's global R&D activity, conducts research and innovation – achieving together whilst supporting our employees. We are looking for a Quantum Computing (QC) Manager to build a team that will develop technologies that will be incorporated into Fujitsu's future quantum computer hardware. These technologies will be used to strengthen Fujitsu's quantum computing offerings in various fields such as finance, healthcare, social infrastructure and so on.

Your role will involve:

- Surveying new technologies related to the diamond-spin based QC, and determining a research plan accordingly
- Collaborating with external academic partners and identifying research problems that will aid fulfilling Fujitsu's QC strategy
- Managing IP and research output generated in the group through patents, publications, technical reports etc.
- Managing the research budget regarding personnel costs, Capex, Travel etc.
- Identify and fulfill team requirements like hiring new researchers and supporting their development
- Communicating research output, research directions and requirements to various stakeholders and make changes based on feedback provided
- Collaborate with other Fujitsu research teams worldwide, industry stakeholders, and government agencies to accelerate research output.

Your role will be based in the UK but will require international travel on an ad-hoc basis. You will report into both the local Group Manager in FRE and the Project Director in our Laboratories in Japan.

Your experience

To be suitable for this opportunity, you will be pro-active in your approach, adaptable and able to demonstrate that you have:

- R&D management experience, ideally Postdoc (from either an industrial or academic setting) in the field of Quantum Computing hardware technologies. Both experimental and theoretical experience are welcome.
- Experience and knowledge in any of the following: quantum devices/quantum physics/quantum optics/microwave engineering
- Experiences at leading or substantially contributing to some research projects in QC or a relevant field .
- Proven experiences at writing and reviewing papers that have been accepted by journals or conferences in QC or a relevant field.
- Excellent written and verbal communication skills

Achieve together

We want the best people on our team, so we welcome and encourage applications from people with a diverse variety of experiences, backgrounds and identities. The role may demand some flexibility to meet business needs, within a culture of respect for professional and private commitments. We are committed to equality of opportunity for all. To learn more about this opportunity, please contact: dlFLERecruit@UK.fujitsu.com
