

Azure Cloud

Accelerate your digital innovation with a flexible, agile approach that looks to the future and enables growth

Organisations are increasingly under pressure to pursue the benefits of digital transformation. But with security coming under ever-increasing levels of scrutiny, digital adoption can pose substantial threats. While a cloud-based approach is the natural starting point for any digital transformation journey, these highly stringent security demands are stalling many organisations' digital aspirations.

Today's challenge is no longer whether to adopt a cloud-based approach, but rather how cloud can accelerate digital innovation in a secure environment. As more and more technology products and services are becoming cloud capable, organisations are striving to adapt their security and privacy policies to be cloud compatible. Combine this with an organisation's demand for more flexible, easy-to-consume technologies and the result is that cloud is becoming the default for infrastructure services.

To satisfy this expectation, Fujitsu Secure Cloud: Azure offers design, build and support services for safe and compliant use of the complete Microsoft Azure Services portfolio including:

- **Hyperscale Cloud:** modernise legacy systems with hyperscale cloud for cost-effective and right-sized infrastructure
- **Sovereign Cloud:** process and store your most sensitive data using familiar Azure solutions, in your own data centre, disconnected from the public cloud with Azure Stack Hub
- **Tactical Edge:** Azure Stack Edge supports service members at the tactical edge with ultra-portable and autonomous data, analytics and collaborative technology.

A partner you can trust with your Microsoft Azure deployment

Fujitsu has been a trusted solutions provider to the UK Government for well over 50 years, providing highly secure solutions to organisations, including MOD. Utilising this wealth of experience coupled with our extensive business, technical and security expertise, Fujitsu can work with you to understand the nature of your business needs and specific security obligations.

Using the latest digital technology, we help to revolutionise business outcomes and offer 24x7x365 support and network services to 250,000 service personnel around the world. We own unique intellectual property to help you achieve accelerated digital transformation while minimising risk, and can partner with Defence and National Security organisations and contractors at any stage of your cloud journey.

So, whether you are just getting started or seeking to optimise or enable your digital transformation, Fujitsu can deliver the security, flexibility and innovation of a global Azure provider with decades of Microsoft experience, offering:

Complete management

Our multi-cloud managed services for Microsoft Azure gives you complete freedom as it scales up and down as your usage of the service changes. At all times, you are in complete control of your costs as we:

- Manage configuration changes, and the implementation of new features within the estate
- Monitor usage to identify threshold limits and proactively identify faults
- Support your business with issues relating to your workloads on Microsoft Azure, to ensure seamless running of your operations
- Provide complete transparency with in-depth business reporting including billing, change, incident and monitoring reports with optimisation recommendations.

Complete confidence

Fujitsu has a wealth of experience in managed services for UK Government, Defence and National Security organisations and associated contractors. We've applied this knowledge to multi-cloud and hybrid infrastructures to give you complete confidence in the security and reliability of your estate. Our multi-cloud managed services enable you to:

- Demonstrate continual compliance with your regulatory requirements
- Implement our expert security policies within your Azure estate, giving you confidence that it's secure, compliant and resilient
- Learn and receive help from Azure accredited experts, a Microsoft CSP provider, and Gold Partner for cloud competencies
- Host modern workloads with the most stringent security requirements in your own private cloud, based on Azure Stack Hub
- Run AI in the toughest, most isolated of environments with Azure Stack Edge.

Completely future-proof

Our multi-cloud managed services are fully future proofed, focused on making sure your estate continues to deliver for you now, and in the future through:

- Agile service development, offering support for new features as you require them
- Support for our own cloud platforms and those of other major providers
- Further offerings to orchestrate within and between your different platforms, and provide further insight and visibility to continuously evolve your estate.

Complete flexibility

Our multi-cloud managed services have been designed to be as flexible as Microsoft Azure itself with:

- Consumption-based charging – you only pay for what you use
- No minimum or maximum number of components to be managed
- SLAs designed around your specific needs.

Fujitsu is a Gold Microsoft Partner with verified competencies and specialisations in:

Competencies

- **Gold** Application Development
- **Gold** Application Integration
- **Gold** Collaboration and Content
- **Gold** Communications
- **Gold** Cloud Platform
- **Gold** Cloud Productivity
- **Gold** Data Analytics
- **Gold** Data Centre
- **Gold** Data Platform
- **Gold** DevOps
- **Gold** Enterprise Mobility Management
- **Gold** Enterprise Resource Planning
- **Gold** Messaging
- **Gold** Small & Midmarket Cloud Solutions
- **Gold** Project and Portfolio Management
- **Gold** Security
- **Gold** Windows and Devices.

Advanced specialisations

- Azure Virtual Desktop
- Identity and Access Management
- SAP on Azure
- Windows Server and SQL Server Migration to Azure.

Proven security and information assurance

Our ability to deliver this approach at heightened security levels is well proven. Fujitsu Secure Cloud: Azure builds on our extensive experience of delivering highly secure solutions for numerous Government services that operate at SECRET or ABOVE SECRET classifications. In the UK, Fujitsu is certified for Cyber Essentials Plus and is also certified to ISO 27001, an independent international information security management standard.

Fujitsu will work closely with customers to ensure our information security standards meet the customer's own security and risk management requirements. In addition, Fujitsu shall adhere to all requirements stipulated by industry regulators, including the Defence Cyber Protection Partnership, and HMG Security Policy Framework and supporting Security Policies.

High-speed network connectivity

As the provider of the Global Connectivity Service to the UK Ministry of Defence, Fujitsu is ideally placed to provide high-speed secure network connectivity. A flexible range of hosting options are available to meet the specific needs and requirements of customers. The service can either be hosted in one or more of our dedicated data centre facilities, or where necessary, the customer's data centre may also be used. The service can also be hosted in the dedicated public sector Crown Hosting data centres too, or a combination of facilities, as required providing optimum flexibility. Fujitsu has the agility and capability to deliver an organisation's specific needs and requirements.

Why Fujitsu in Defence & National Security?

Our world is being disrupted. But together with you, Fujitsu's ambition is to build a brighter, more sustainable future for us all.

We want to work together to navigate this digital disruption collaboratively, and explore solutions to the evolving threats we face today. Together, we can exploit technology that will drive high-impact improvement, transform our digital future, and help to make us more sustainable in every way.

We can do this by harnessing technologies such as AI, machine learning, digital twin, quantum, and high-performance computing. Our vision uses the power of everyone, bringing together our integration capabilities and knowledge in managed services with cognitive and advanced technologies that will drive your digital transformation. By elevating people higher up the value chain allows the smartest ideas to emerge to tackle tomorrow's big challenges today – whatever they may be.

With our technological inspiration and business vision from Japan, we touch the lives of millions of people around the world every day. For over 60 years, we've been working at the highest levels of security demanded by militaries, governments, and industry to ensure the UK's most critical infrastructure operates smoothly, 24/7.

We've continually had to adapt to a changing world, and we will keep evolving in the face of future threats. We are diverse, creative, talented, and different. And we are committed to building new possibilities for everyone. By connecting people, technology and ideas, we are making the world more sustainable by building trust in society through innovation.
