

# Playing our part

For the environment

# Becoming more sustainable across Europe

Whether you're a Fujitsu customer, a potential employee, or would just like to know a little more about us, we're pleased to welcome you into our world.

Improving environmental impact is high on our agenda. At Fujitsu, we believe that sustainability requires more than simply good intentions. That's why we're taking positive actions, both to transform our own organisation and to support our customers across Europe.

Fujitsu Europe incorporates **Net Zero targets** as part of our business strategy.

Across Europe, environmentally efficient Fujitsu offices are creating **modern, flexible, sustainable workspaces** for our people.

Since 2017 we have reduced the total footprint of our HQ buildings across Europe by 53%.

Fujitsu ranked in **top 5%** of **S&P's Global Sustainability Yearbook 2024**. Over 9,300 companies worldwide evaluated, of which 759 companies were selected.

Spanish pharmaceutical company **Bidafarma**, has optimized distribution from warehouse to pharmacy. Fujitsu created an algorithm that automatically calculates the most sustainable delivery route, reducing costs and fuel emissions by 25%.

To date **over 500 Fujitsu colleagues** in the UK, Ireland and France have joined the global **Climate Fresk movement** by attending a workshop to learn more about the cause and effects of Climate Change.

Fujitsu collect Scope 3 data from key suppliers in 7 countries, **enabling us to report on our Supply Chain emissions** and collaborate with our suppliers on reducing our collective emissions.

Fujitsu is included in both the **FTSE4Good** and the **UN Global Compact 100** listings, in recognition of our worldwide commitment to environmental and social practices.

Fujitsu's Track and Trust service, ensures end-to-end transparency and traceability, helping **Botanical Water Technologies'** aim of providing 100 million of the world's most disadvantaged communities access to safe drinking water by 2025.

Our asset lifecycle approach ensures that old IT devices are routinely **cleaned, re-built and repurposed**. Where a device can't be re-used, we recycle the components instead.

Overall, **nearly 80%** of the energy Fujitsu consumes across Europe is renewable, with six countries already achieving 100%.

Working with the German municipality of **Barsbüttel**, Fujitsu collated and analysed data from local schools to improve energy footprint and lower costs, whilst optimizing learning conditions for students.

Fujitsu has been recognised in the **Dow Jones Sustainability World Index** every year since its inception in 1999.

By implementing **DocuSign**, we've removed the need to print, scan, mail and store documents; saving over 17 million sheets of paper to date, as well as trees, water, CO2 and waste.

Using Fujitsu Blockchain  
**AB InBev**, the Belgian brewer  
of Leffe, now have full  
transparency of its barrels'  
supply chain from farm to  
glass, having optimized its  
barley harvesting time.

Since 2018, we have **reduced our carbon footprint**, in terms of electricity, heating and company car fuel usage, **by 78%**, equivalent to planting 50,000 trees or the annual carbon footprint of over 2,000 people.

Fujitsu has achieved Europe-wide **ISO 14001** status, the internationally recognized certification standard for environmental management systems.

Fujitsu is proud to partner with the Finnish city of **Lahti**, European Green Capital 2021 by facilitating innovation workshops on recycling for citizens and for the local hospital.

Fujitsu hosted a **Sustainability Week** in November 2023 which saw 2,500 European colleagues participate across 20 sessions to learn more about what we are doing internally and with our customers.

Supporting **Centrica**, a leading UK energy supplier to reduce their scope 3 emissions by measuring, reducing and offsetting the carbon footprint of the services we deliver. To date over 430 tonnes of CO2 has been compensated since 2019.

Our UK team is working with ICE AquaSmart on a project to replace cleaning products with **aqueous ozone**. By combining air and water it creates a solution 30 times more powerful than bleach – removing delivery miles, chemicals and single-use plastics.

Our customer **Tex.tracer** wanted to create a radically different fashion ecosystem by providing transparency in the supply chain. Using Fujitsu Blockchain brands, retailers and consumers can now track their garment's supply chain journey via a QR code.

In support of **World Clean-Up Day 2023**, our team in Portugal collected over 28kg of waste including 14kg of plastic, 11kg of wet wipes and 2,500 cigarette stubs.

Fujitsu has been included in the **Carbon Disclosure Project (CDP) A-List** for climate change for the past seven years.

Fujitsu supports Sweden's **Forestry Research Institute Skogforsk**, to automate their driverless machines using 5G; enabling a single driver to operate multiple machines, helping to improve safety and save energy.

Working with **Arbeit für Menschen mit Behinderung**, the Fujitsu team in Germany is recycling redundant IT to create new employment opportunities for people with disabilities.

Our eight Fujitsu beehives,  
**housing over 300,000 bees,**  
produce almost 100kg of  
honey annually.

# Closing the sustainability gap

As you can see, Fujitsu is taking positive actions, both to transform our own organisation but also supporting our customers.

Research conducted by Fujitsu in conjunction with the FT shows that whilst organisations are enthusiastic about sustainability and believe they're excelling in it - the fact is, they have barely started.

The Fujitsu Uvance report explores the perception and reality, and we look into how technology can close it.

**[Read the report and find how to close the gap](#)**
