Upgrade your transactional systems by transforming underlying business processes into a state that can be automated with an Oracle, SAP, or Microsoft solution.

**Challenges**
If your processes have been overly-customized, you may not be able to upgrade your software system. Thus, you are forced to keep using an older version that does not meet the requirements of your business.

But transforming to a standard process may still not be acceptable, particularly if the process is not able to meet all of your customer's needs. Consequently, process alterations are still needed to complement the software system enhancements.

**How we can help**
The IT Enablement – Process Transformation service prepares your organization for automation by transforming existing processes into processes that can be automated using your preferred software system.

**Benefits**
Once you implement this solution you will not only be able to exploit the most up-to-date software for your mission-critical processes, the processes will be automatable enabling you to more closely tie the processes to your ever-changing business requirements.

**How it Works**
This service helps you upgrade your transactional systems by transforming underlying business processes into a state that can be automated with an Oracle®, SAP®, or Microsoft® solution.

We take a four-phase approach:
- **Phase 1.** Model the as-is state using Fujitsu Automated Process Discovery (APD)
- **Phase 2.** Work with you to model the future (to-be) process
- **Phase 3.** Perform a gap analysis, prioritize the changes and plan the change roadmap
- **Phase 4.** Implement the changes using a plan-do-check-act (PDCA) cycle at the process level

**Why Fujitsu**

**Lean Management**
- Fujitsu realizes that lean management is an extremely powerful vehicle available to any organization. Lean is a way of seeing, thinking and doing, it isn’t about grabbing what seems to have worked elsewhere, and plugging it into your own environment. Whatever your organization – it’s your observations, standards, and assessments that count. Going lean means departing from the path of the herd and committing to the path that’s right for your business; Fujitsu can help you find that path.
About Fujitsu America

Fujitsu America, Inc., is a leading ICT solutions provider for organizations in the U.S., Canada and the Caribbean. Fujitsu enables clients to meet their business objectives through integrated offerings and solutions, including consulting, systems integration, managed services, outsourcing and cloud services for infrastructure, platforms and applications; data center and field services; and server, storage, software and mobile/tablet technologies.
