

Fact Sheet

Windows XP End of Service Support

The Fujitsu comprehensive approach guides the client through the migration process within a flexible model that accommodates existing business processes and time-lines while minimizing end-user disruption

The Challenges

- Things to consider for planning a migration: hardware compatibility and performance, application compatibility and infrastructure integration
- Many customers may have begun migration but now Microsoft has released Windows 8 and customers are asking for information and direction.

How we can help

The Fujitsu Windows 7 Migration service provides the methodology, skills and tools to simplify the migration process while minimizing disruption. We have developed a Standard Framework for implementation with distinct phases, defined deliverables and templates to ensure success. Green ICT

Benefits

- Enables the business to focus on managing the business without end-user disruption
- Provides a quicker path to the improved user productivity and satisfaction that Windows 7 brings
- Provide tool sets for automated discovery across multiple operating systems versions, accelerating the overall application rationalization and packaging process.
- Provides a fully automated desktop transformation combined with on-site expertise

How it works

- **Engagement** is focused on the initial

requirements to identify the best solution and approach

- **Assessment** is focused on the discovery exercise for the existing environment to assess readiness for Windows 7 migration, and the development of a high-level plan to complete a successful migration.
- **Design** involves planning the architecture, engineering and environmental remediation required to prepare for Windows 7 migration.
- **Transformation** is the actual deployment of Windows 7 and associated software to the end-user
- **Business as usual** covers on-going support and operation of the Windows 7 environment.

Why Fujitsu

We have the ability to quickly help clients map their existing environment and produce a comprehensive roadmap for a migration that takes into account in-place Windows 7 migration, Windows 8, Mobile, BYOD and Virtual Desktop options.

The Fujitsu solution is highly scalable and repeatable with dedicated technical experts to support any size of engagement.

Fujitsu is a Microsoft Gold partner with significant desktop expertise and over 750k desktops currently under management.

Fujitsu Limited

- Microsoft® will support Windows® XP until 8 April 2014
- Independent software vendors (ISVs) will introduce new versions of applications that don't support Windows XP before Microsoft eliminates its support
- Windows 7 features like BitLocker®, AppLocker® and DirectAccess may save money for organizations that implement them by eliminating expenses on third-party software or reducing support labor

About Fujitsu America

Fujitsu America, Inc. is a leading ICT solutions provider for organizations in the U.S., Canada and the Caribbean. Fujitsu enables clients to meet their business objectives through integrated offerings and solutions, including consulting, systems integration, managed services, outsourcing and cloud services for infrastructure, platforms and applications; data center and field services; and server, storage, software and mobile/tablet technologies. For more information, please visit: <http://solutions.us.fujitsu.com/> and <http://twitter.com/fujitsuamerica>

Fujitsu platform solutions

In addition to Fujitsu PRIMERGY servers, Fujitsu provides a range of platform solutions. They combine reliable Fujitsu products with the best in services, know-how and worldwide partnerships.

Dynamic Infrastructures

As a global IT infrastructure provider, Fujitsu offers a complete range of servers designed to fill any role in today's business. Whether your business requires affordable entry-level servers, compact and scalable blade systems, or advanced multiprocessor servers capable of handling the most demanding data center applications, the PRIMERGY® line delivers Intel® Architecture servers with the rock-solid reliability and industry-leading performance you need.

PRIMERGY Servers
