

Transform with confidence to hyper-converged IT

FUJITSU Integrated System
PRIMEFLEX® for Storage Spaces Direct

What do companies expect of hyper-converged infrastructures (HCI)? Can HCI really deliver?

The DIY approach is a rocky road...

Better go with the right vehicle!

Take the direct Route with **ready-integrated** PRIMEFLEX for Storage Spaces Direct from Fujitsu:

- Ramp up new virtual infrastructure fast
- Reduce storage costs
- Simplify management
- Grow as you go

What is PRIMEFLEX for Storage Spaces Direct?

An **Integrated System** with high performance, energy-efficient Fujitsu PRIMERGY® standard x86 servers combined with software-defined server and storage technology integrated in Microsoft® Windows Server® 2016

Six reasons to invest in PRIMEFLEX for Storage Spaces Direct

- | | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>#1  Get started FAST
Deploy cluster in under 15 minutes</p> | <p>#4  Store efficiently
Up to 2.4x greater storage efficiency</p> |
| <p>#2  Get brilliant performance
150,000+ IOPS per server</p> | <p>#5  Manage easily
Storage QoS Controls and Health Service</p> |
| <p>#3  Mitigate risk
Built-in resiliency for drive, server, components</p> | <p>#6  Scale to size
Scale from 2 to 16 servers and 384 drives</p> |

With PRIMEFLEX for Storages Spaces Direct, you can

- | | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  <p>Reduce cost
All-in-one system eliminates cost of external storage environment: storage arrays, SAN switches, management tools and staff</p> |  <p>Increase storage efficiency
Set up a tiered storage architecture to keep hot data in a high-performance tier, and colder data in tiers with lower cost per gigabyte.</p> |  <p>Speed up your applications
Set up a high-performance, responsive virtual IT infrastructure that provides consistent IOPS with sub-millisecond response times.</p> |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

“The solution gives us excellent performance, reduces cost for storage, floor space, power and cooling. The flexible platform design allows us to serve both our SMB and enterprise customers and provides us with the investment protection for future growth.”

Adam Lantz
Sales Director, Make IT
