FUJITSU GLOVIA® OM fully-customizable order management solution

Integrate all your business processes, from sales to fulfillment, with unmatched transparency and efficiency. Without ripping and replacing legacy system.

Your business’s ability to plan ahead and react quickly to change is imperative to your business success. However, demand volatility coupled with complex business processes and disconnected systems makes it difficult for you to react quickly to changing conditions. This is where GLOVIA OM can help.

GLOVIA OM is a 100% Salesforce.com®-native, fully-customizable order and inventory management solution that connects sales, service, analytics and financial modules to deliver an integrated, transparent and seamless omni-channel business experience.

GLOVIA OM is Lightning-ready and leverages legacy systems to create a single, accurate source of information for everything from calculating shipping to applying promotions.

Benefits

Improve sales execution
- Increase sales visibility
- Single sales execution process for all source of demand
- Accurate, reliable order commitments

About Fujitsu Americas

Fujitsu America, Inc. is the parent and/or management company of a group of Fujitsu-owned companies operating in North, Central and South America and Caribbean, dedicated to delivering the full range of Fujitsu products, solutions and services in ICT to our customers in the Western Hemisphere. These companies are collectively referred to as Fujitsu Americas. Fujitsu enables clients to meet their business objectives through integrated offerings and solutions, including consulting, systems integration, managed services, outsourcing and cloud services for infrastructure, platforms and applications; data center and field services; and server, storage, software and mobile/tablet technologies. For more information, please visit: www.fujitsu.com/us and http://twitter.com/fujitsuamerica.

Digital Transformation

New digital technology is becoming incorporated into the heart of business and society. Digital is not a single technology, rather a set of connected technologies such as cloud, mobile, Internet of Things (IoT), analytics, Artificial Intelligence (AI) and supporting security technologies. Digital technology can radically transform how the world works. For instance, a manufacturer can leverage a connected, digitalized production line to gain a real time view of its operations, and make changes more quickly, transforming its efficiency. Connectivity greatly reduces transaction costs, and therefore improves the bottom line. Digital technology fundamentally changes an organization, how it operates and how it creates value. Digital transformation is metamorphosis. A core change, not a cosmetic change or an extension. A reconfiguring of a business to provide higher value products or services. Digital technology has grown through four major waves of development. The first wave, the internet, made computing technology available to all, and was the first platform for digital services. The mobile internet followed by making digital services accessible anywhere. The first wave, the internet, made computing technology available to all, and was the first platform for digital services. The mobile internet followed by making digital services accessible anywhere.
