

Check Scanning Made Easy!

One Device. One Solution.

Fujitsu Computer Products of America, Inc. now offers Emmedi's world-renowned 4Cheque software, an advanced check reading software compatible with Fujitsu's fi-Series document scanners. This check scanning solution enables organizations to reduce the number of devices, reduce scan errors, increase efficiencies and recognize cost savings.

Best Performance of Any Check Scanning Software

Easy to Implement

- One solution for any check scanning environment
- Produces high-quality scanned images and scanner reliability
- One device - No need for a stand-alone check scanner and a separate document scanner
- Compatible with these Fujitsu fi Series scanners: fi-7160, fi-7260, fi-7180, fi-7280, fi-7140, fi-7240, fi-7460, fi-7480 and fi-7300NX

Increases Office Efficiency

- Reduces installation, maintenance and operating costs
- Reduces decoding errors which saves time and increases customer satisfaction
- API interface is fully compatible with most bank applications
- Also scans customer ID cards and envelopes

High-quality Performance

- Decodes CMC7 and E13B checks
- Provides better decoding quality than standard stand-alone check scanners

Increased Customer Satisfaction

- Over 80,000 installations of fi-7160 with Emmedi's 4Cheque worldwide
- Reduces customer wait time in teller lines
- Fujitsu's industry recognized U.S. based customer support
