# Fujitsu North America Technology Forum 2015

**Panel Theme:** Reducing Complexity and Generating Valuable New  
Insights from IoT Data

Jorjeta G. Jetcheva, Ph.D.

**Fujitsu Laboratories of America**

February 11, 2015

# Fujitsu North America Technology Forum 2015

## Smart Grid IoT & Data Analytics

Jorjeta G. Jetcheva, Ph.D.

**Fujitsu Laboratories of America**

February 11, 2015

## ■ Supply & demand balancing

- Load & generation forecasting

## ■ Fault prevention & management

- Analysis of voltage & power quality data

## ■ Cyber & physical security

- Communication & video data analytics

## FLA Analytics Research

- C&I site load forecasting
- Traffic analysis for intrusion detection in AMI networks

Best Paper  
Award

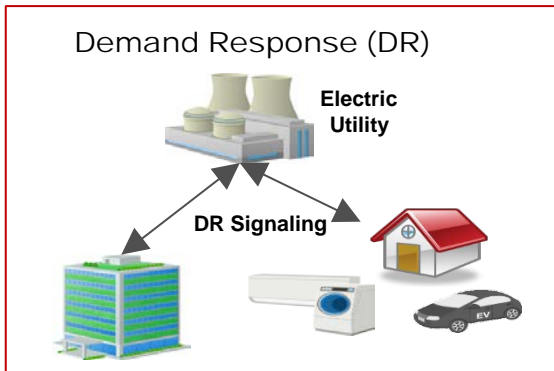

# Energy Efficiency & Environmental Impact

## ■ Detect inefficient/faulty equipment

- Smart meter & sensor data analytics, anomaly analysis

## ■ Get people to be more efficient

- Load disaggregation, sensor & DR analytics

## FLA Analytics Research

- Load disaggregation
- DR participation forecasting
- Gamification for DR

# Some Challenges to Consider

- How can we change people's behavior?
- Balance between too much information & insufficient information?
- Best way to keep the user in the loop?
- How to maximize re-use of IoT devices & data across applications?

# Fujitsu North America Technology Forum 2015

## Innovative ICT Platform in the IoT Era

Naoki Akaboshi  
**Fujitsu Laboratories Ltd.**

February 11, 2015

## ■ Rapid Growth of Data in Digital Universe

- Rapid increase in numbers of sensors
- Doubling in size every two years
- Unstructured data explosion

**Source: EMC Digital Universe with Research & Analysis by IDC 2014**

<http://www.emc.com/leadership/digital-universe/2014iview/executive-summary.htm>

## ■ Fujitsu “Akisai” Cloud Service for Agriculture

- Sensor data is used for cultivation scheduling
- Fujitsu succeeded to harvest low-potassium lettuce which is known to be difficult to watering

## ■ Automated Identification Technology

- Airbus selected Fujitsu RFID technology to deliver dependable management and traceability of aircraft parts

- Enterprises can benefit from IoT Data in many areas
- However, significant challenges exist in using IoT Data to drive value in the enterprise
  - Expanding velocity, volume, and variety of data require new technology solutions
  - Retrieving useful information from unstructured data requires huge computing ability and is challenging
  - The end of *Moore's Law* on the horizon

## ■ GPGPU/FPGA

- Microsoft and Baidu find speedier search results through FPGA

## ■ Neural Networks

- Neuro Chip

## ■ Quantum Computing

**The D-Wave processor**

# Fujitsu Sprout = Mobile Platform for Realtime IoT Data

Real-Time

Mobile

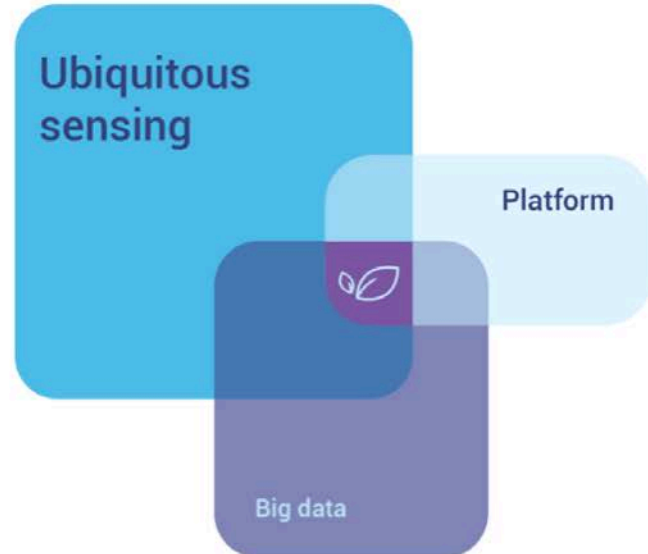

Extensible

Platform

Sprout enables real-time mobile personalized data driven services

- Handles **real-time** data streams
- Is **mobile**
- **Any sensor** can be integrated
- Is a service development platform: has an **open API** for real-time mobile access to multiple data streams
- Can be deployed on **any Android device**

**FLA's realtime mobile stress analytics are best-in-class**

# Wellness at Work IoT Service

Sony's business problem: ROI of sit-to-stand desks?  
Sprout solution: quantify people, desks; analyze big data

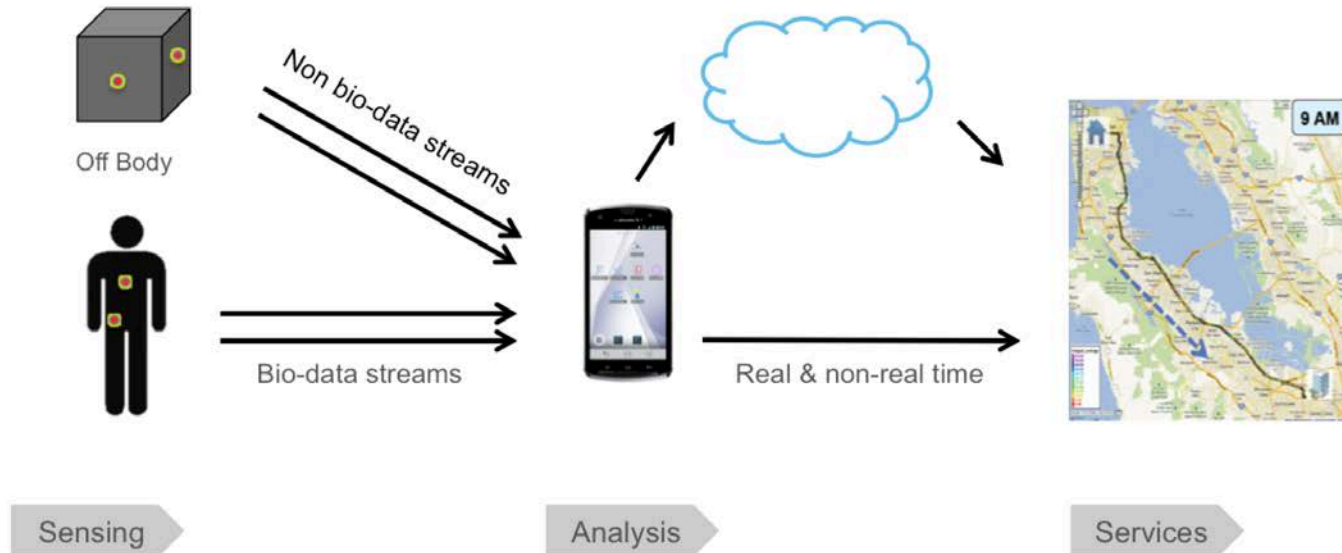

# IoT Services = Novel Business Solutions

Business problems are often data problems. Sprout enables data-driven solutions to such problems.
