

# Fact Sheet

## Fujitsu ETERNUS CS LINK for z/OS

The ETERNUS® CS LINK for z/OS allows tape operations from IBM® mainframe systems with ETERNUS CS High End

### ETERNUS CS LINK for z/OS

The ETERNUS CS LINK for z/OS is the new library management software to integrate ETERNUS CS High End in z/OS environments. Installed at the z/OS platform it enables fast backup and recovery of entire systems, databases or individual user data. The concept includes:

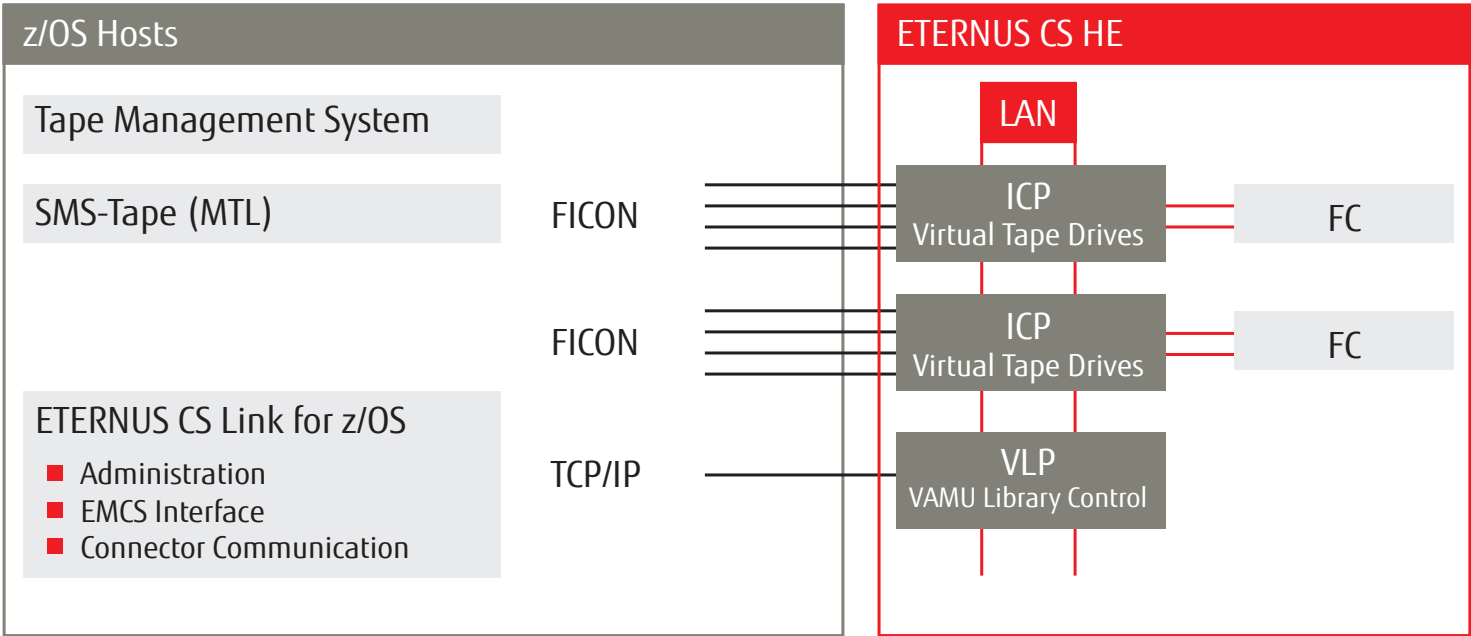

- Use of standard z/OS mechanisms for tape device allocation and mount influencing
- Coexistence with all other available control software for this purpose (CSMVS, NCS, ELS and HACC)
- Support of tape management systems (CA1 (restricted in V1.0A) and DFSMSrmm)

### Main features

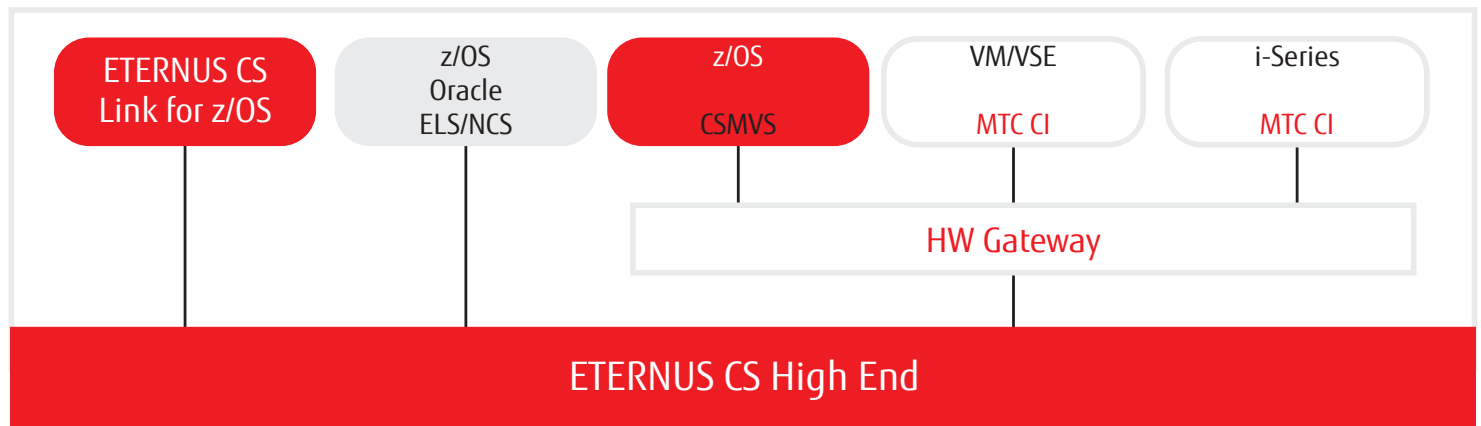

ETERNUS CS Link for z/OS provides following main features in z/OS:

- Allocation via standard IBM DFSMS functions
- Mount interpretation via EMCS (Enterprise Management Console) console and scratch selection
- TCP/IP connection to ETERNUS CS High End connected via LAN

ETERNUS CS Link for z/OS uses the VAMU, the Virtual Library interface of ETERNUS CS High End. Logical drives are defined as 3490 MTL tapes in z/OS.

# The ETERNUS CS High End client software family

## The ETERNUS CS LINK for z/OS is part of the ETERNUS CS High End client software family

- ETERNUS CS LINK for z/OS is the new base to integrate the ETERNUS CS High End in large scale z/OS environments. A key feature is the usage of standard z/OS mechanism for tape device allocation and mount processing.
- Oracles® ELS/NCS Software can be used and delivered to integrate the ETERNUS CS High End into a heterogeneous or existing Virtual Tape Environment.
- ETERNUS CS client for MVS (CSMVS) is the client in conjunction with the gateway server for small or midrange environments, which can also handle heterogeneous platforms. Via TCP/IP it issues requests to the VACS Virtual Library Interface running in the ETERNUS CS High End data protection appliance through a FS5193 gateway and provides access to the resources of the ETERNUS CS High End (volumes and drives) to the host.
- MTC CI (for VM/VSE and i-Series) for integrating ETERNUS CS High End into VM/VSE or i-Series environments. A hardware gateway (HW Gateway) is required and part of the offering.

## About Fujitsu America

Fujitsu America, Inc., is a leading ICT solutions provider for organizations in the U.S., Canada and the Caribbean. Fujitsu enables clients to meet their business objectives through integrated offerings and solutions, including consulting, systems integration, managed services, outsourcing and cloud services for infrastructure, platforms and applications; data center and field services; and server, storage, software and mobile/tablet technologies. For more information, please visit: <http://solutions.us.fujitsu.com/> and <http://twitter.com/fujitsuamerica>

### Fujitsu OPTIMIZATION Services

In addition to Fujitsu ETERNUS CS High End Data Protection Appliance, Fujitsu provides a range of platform solutions. They combine reliable Fujitsu products with the best in services, know-how and worldwide partnerships.

### Dynamic Infrastructures

With the Fujitsu Dynamic Infrastructures approach, Fujitsu offers a full portfolio of IT products, solutions and services, ranging from clients to datacenter solutions, Managed Infrastructure and Infrastructure-as-a-Service. How much you benefit from Fujitsu technologies and services depends on the level of cooperation you choose. This takes IT flexibility and efficiency to the next level.

### Computing products

[www.fujitsu.com/fts/products](http://www.fujitsu.com/fts/products)

- PRIMERGY®: Industrial standard server
- SPARC Enterprise®: UNIX server
- BS2000/OSD Mainframes
- PRIMEQUEST®: Mission-critical IA server
- ETERNUS®: Storage system

### Software
