

Fujitsu GLOVIA® OM  
Order and Inventory  
Management for the  
Medical & Diagnostics  
Technology Industry

**GLOVIA® OM, the answer to your medical device supply challenges**

Despite the notable development in medical technology, the Medical & Diagnostics technology industry continues to face various challenges which hinders growth, productivity and revenue. Fujitsu GLOVIA® OM recognizes the ten most prominent pain points within the Medical & Diagnostics technology industry and how organizations can overcome these challenges with GLOVIA OM's cloud-based solution tailored for the Medical & Diagnostics technology industry.

shaping tomorrow with you

## Top 10 Medical & Diagnostics Technology Industry Challenges

### Medical Device Tracking

Track across multiple locations, categories & conditions. Group items by location, condition (in and out) or custom categories

### Centralized Inventory Management

Better oversight and tracked inventory transfers with multi-site functionality. Use 1D or 2D barcode scanning to reduce inventory as items are removed from the shelf. Link inventory to ordering for instant access to inventory levels for better usage tracking. Reduce clutter with paperless delivery reconciliation and confirmation.

### Achieve Compliance with Global Regulations

Sail through audits by tracking and tracing each item's serial and batch number.

### Trunk Stock Visibility

Eliminate data silos and access available trunk and consignment inventory that impacts the bottom line.

### Demand Forecasting

Advanced cloud-based planning solution that tracks usage and custody of medical inventory for better demand forecasting and inventory planning.

### Tracking Product Expiration and Faulty Devices

Reduce wastage and cost with batch and serialized expiry date tracking. Assign inventory dispensed to employees, doctors and patients, capture all critical data for future reporting.

### Managing Device Recalls

Automate product recall workflows and block on-hand inventory from reservation and delivery.

### Mobile Inventory Tracking

Increase efficiency with on-the-go access. Check – from anywhere and using any device – whether instruments and implants are available as soon as you or your customer needs them.

### Streamline Multiple Legacy Systems

Easily integrate with your existing applications to eliminate double entry and give you 360 view of your customer.

### Capital Equipment Consumption Report

Secure competitive advantage with data-driven insights that impact your bottom line. Identify key trends and patterns to inform your business decision-makers and stakeholders.

## GLOVIA OM's Key Benefits for the Medical & Diagnostics Technology Industry

GLOVIA OM understands that most of the medical device & diagnostics companies rely on the traditional ERP based Warehouse Management System. One of the main solutions we can provide is **real-time inventory tracking** for sales reps or field service engineers.

## GLOVIA OM Order and Inventory Management for the Medical & Diagnostics Technology Industry

### Deploy within weeks, recognize your ROI within months
